

# SIGNALYSIS<sup>®</sup>

1ST ANNUAL USERS CONFERENCE

NOVEMBER 1-2 CINCINNATI OHIO

## April in Paris, Springtime in New York, November in... Cincinnati?

That's right - this fall will feature the largest collection of Signalysis customers on the planet; and we want you to be a part of it! This is your chance to come together with Signalysis engineers, software developers and other SigQC users for two days of learning, ideas exchange, and a little fun.

Help us to help you make game-changing improvements to your product quality and processes. Come and share your experiences (good and bad), learn what's ahead from Signalysis, see presentations from fellow SigQC users, and tell us what new software features are important to you!

Want more? We're including an optional third day (November 3) allowing you an opportunity to meet with our staff and gain some hands-on training geared for your specific applications.

## Call for Presentations

You're invited to share your experience! Submit a brief outline on your application of SigQC™ software, end-of-line quality inspection, sound & vibration, and related topics. Presentations should be about 20-30 minutes in length (with a couple of minutes for a standing ovation and questions). To be considered please e-mail us a brief description of your topic to us by September 1, 2017.

### REGISTRATION FEES

2 DAY BASIC

**\$175**

3 DAY EXTENDED

**\$275**

## THIS IS YOUR OPPORTUNITY TO:

- Learn about upcoming SigQC software enhancements
- Provide input to new software features/functionality
- Take part in a Q&A panel discussion
- Meet face-to-face with Signalysis engineers and developers
- Meet with others throughout the Signalysis user community
- Share your experience with and learn from colleagues
